CROSBY S. NOYES..... Editor. THE EVENING STAR has a regular and permanent Family Circulation much more than the combined circulation of the other Washington dailies. As a News and Advertising Medium it has no competitor.

ITIn order to avoid delays on account of personal absence, letters to THE STAR should not be addressed to any individual connected with the office, but simply to THE STAR, or to the Editorial or Business Departments, according to tenor or purpose.

#### The President and Trusts.

Representative Clayton of Alabama is feeling good over the prospects of the democracy on the trust question. He tells a Star reporter:

"Every time President Roosevelt delivers himself on the trust question he does two things. He makes democratic votes, and he lessens his own chances of being nominated. It might be said that he is also doing another thing by his trust campaign-he is undoubtedly making a division in the ranks of

his own party.
"Those who listen to the President's trust doctrines know that they are represented in party politics only by democrats. He is plugging our game, and we do not want him to stop. When he gets the people educated and aroused to the necessity of action by Congress on this question, a thing which not only he but the democratic party is doing, these same people will have also come to realize that the democratic party is the only hope they have for the accomplishment of this purpose.

Mr. Clayton is on a stumping tour and talks in the stumping vein. The stumper must of all things be confident. He must see things as coming his way. The "boys" are waiting for a pleasant message, and it is his mission to carry it to them. He must stir them up; must make them feel not only that the opposition is dead wrong, but that a just fate is about to overtake it. The stumper has his uses, but they are rarely those of a reasoner.

When his stumping tour is over Mr. Clayton will be able to see two things. The first thing is that Mr. Roosevelt is not injuring his chances for nomination at all by anything he is saying on the trust question. To the extent that his deliverances are unwelcome in real trust circles he will profit if the actual facts are spread before the people. If his chances were slender he could afford to speak twice on the subject to where he is now speaking once. But as matters stand today he has no competitor for his party's presidential nomination two years hence. The trusts have not made him, and they cannot break him. He is his party's leader by a flat higher than theirs.

The second thing Mr. Clayton will discover is that voters of independent proclivities are weighing both parties in the balance on the trust question. The republican policy as suggested seems slow. It is insisted that the present anti-trust law is inadequate, and that in some manner it should be strengthened. A constitutional amendment is proposed, but that calls for time, not to mention the other difficulties in the way. The only democratic policy suggested is the putting of trust-made articles on the free list, and that is simply a thinly disguised form of striking at protection as the national policy. Now is it at all likely that the people are ready to give up protection as a policy? Are not its benefits too conspicuously in evidence just now to make any such proposition acceptable? Trusts horse for free trade.

### The Cuban Bond Issue.

The passage of the loan bill by the Cuban house of representatives advances that problem one step nearer to a solution. It will not necessarily lead to a complicated situation. The United States has of course an interest in the affair, and is watching it with extreme care. It does not desire to see Cuba deliberately load herself down with debt at the outset of her independent career, but can not with a clear conscience say at this stage that the government shall not issue bonds. The United States has itself neglected one of its most urgent duties in connection with Cuba and has thereby made it difficult for the island to pay its way, and thus has led to the necessity for a bond issue. At the same time the neglect of the United States to provide a market for Cuba's wares has curtailed the insular revenues to the point where they will not suffice to meet the interest and sinking fund obligations imposed by the maximum of the proposed bond issue. Morally the United States has weakened its self-declared right to prevent an overissue of bonds. Practically the case will doubtless work itself out without precipitating any crisis.

President Palma has already expressed his judgment that Cuba should not hastily run into debt. He believes that the bulk of the proposed loan, designed for the payment of the army of liberation, can be postponed for a season. If this be done there need be no difficulty. Cuba can presumably take care of a four or five million dollar loan, to foster the agricultural interests of the island during the temporary depression. The bill passed by the house proposes such an issue at once, with others to the extent in all of \$35,000,000 following as the executive deems it wise to emit them. Thus even should the measure become a law at once there is little likelihood of its leading to difficulty before the American Congress meets in December.

First of all, Cuba must float the loan, and if any question exists anywhere as to her ability to care for it properly Wall street will feel that sentiment most strongly. If there is such doubt the loan will not be floated. Therein lies the surest safeguard against a complication necessitating the active intervention of this government. But the best way out of the difficulty will be for the United States to perform its own "plain duty" in the premises as soon as time will permit and thus clear its skirts of all responsibility for the Cuban financial emergency calling for a heavy loan.

There is probably no enterprise requiring capital, scientific, industrial or philanthropic, to which John D. Rockefeller has not been cordially invited to contribute.

+++ The automobile seems destined to supersede the horse; but in establishing its supremacy the automobile should not be per-

mitted to indulge in massacre.

### The Southern Situation.

Mr. Hanna promptly puts a quietus on that silly yarn about an early conference between the President and himself on the subject of politics in the south. Why should they be discussing that subject at this time? There is nothing new in the southern situation, unless it be the nomination of a few republican candidates for Congress at the President's instance, and that means nothing but an exposure of how idle the twaddle of machine politicians in that quarter has been about negro domination. The negro is no longer a factor in politics in the south. but his elimination means no break in democratic supremacy there. Things will go on as before. The democrats will continue to elect their state tickets, and to send delegations of their own choosing to Congress. What can either the President or Mr. Hanna do about that? Absolutely nothing. Until the republican party makes an issue of constitutional representation in Congress and in the electoral college the power which the south now wields in our national affairs will be safe.

Testimony from the best accredited demo-

to the situation in the south. Mr. Broussard has spoken for Louisiana. Mr. Hay has spoken for Virginia. Senator Simmons has just spoken for North Carolina. Alabama in her primaries has just gone on record. Senator Jones of Arkansas, in an interview, replies as follows to the inquiry as to the effect of the elimination of the negro

"It will, unquestionably, lead to the affiliation with the republican party of some white men who have hitherto been mocrats upon the race question. I do not, however, look for any radical change for some time to come, because the physical presence of the negroes will continue to keep the white men politically solid, even though the negro does not vote. The republicans will make the most of the climina tion of the negro by appealing to the selfish instincts of the south in regard to the protective tariff. There are some white democrats in the south who have also be come protectionists because they think that system will benefit them, but the great rank and file of the southern people will not be caught by such doctrines. There will be some change in the white vote, but not enough for some time to come, in my judg-ment, to result in any marked change in po-

litical conditions in the south We may go to Arkansas for still stronger testimony than this as to the unshaken state of the democracy there. In what state where political divisions exist and the party tag is not supreme could such a man as Mr. Davis be elected governor? What party would have dared to put up and support a candidate whose personal record showed such besmirchment at the hands of a respected religious body? Mr. Davis had but to secure his party's nomination, and party prejudice did the rest with ease. He cost no votes as the result of his expulsion from his church affiliations on charges al-

leging drunkenness and gambling. No, there is no reason why the President should want to discuss the southern situation with any outsider, and but little reason why he should want to discuss it with southern men themselves. The November polling in its general result will tell the same old tale.

The Suburban Grade Crossing. The grade crossing at which Major O'Driscoll was killed by a train the other day is absolutely unguarded. The electric bells which ring when a train is approaching cannot be considered as a sufficient safeguard. Again and again have these devices failed to insure against accidents. It has been shown by repeated disasters that the sound of the bell may be inaudible to a person driving in a carriage, being drowned by the noise of the wheels or muffled by the

wind. Furthermore, this device makes no

provision for the deaf, and, finally, it may fail to work owing to some derangement of the apparatus. It is not enough merely to notify the public that a train is approaching. The railroad occupies an open space and employs a most dangerous agency. At all points where the public, in its ordinary course of traffic, must gain access to the tracks the railroad should provide a suitable barrier to be lowered whenever a train approaches, so that a person cannot reach the rails without deliberately forcing a passage, thus assuming all the risk of crossing. The burden of responsibility in the absence of gates is upon the railroad company, not upon the individual, whose right

to the highway cannot thus be infringed

without provision for assured safety.

The grade crossings lying outside of the urban area of the District have during late years proved even more deadly than those in the city itself, owing to the guarding of the latter with gates and the exposure of the former with only the electric bell system as a makeshift safeguard. A few of cannot, successfully, be made a stalking these crossings have, after fatalities, been provided with gates, but many remain to be thus equipped. It is within the power of the District Commissioners to compel the railroad companies to provide the barriers at all crossings in all parts of the District, and they should forthwith proceed to exercise that authority and to take this long step toward making the danger points approximately safe. It must be borne in mind that the proposed terminal improvements, which at best cannot be completed for five or six years, will not affect the suburban regions, and that these country crossings will remain as dangerous as ever, however safe the city streets may have become.

The community should not be compelled to go through the slow, costly process of paying for every new gate with a human life. The warning given at one of these places where an accident occurs should suffice for the whole system. If there are roads which the railroad company cannot be compelled to guard with gates by reason of the fact that they have never been condemned as public thoroughfares across the right of way, steps should be taken at the first opportunity to secure their legalization, so that the companies will have no vestige of excuse for persisting in their refusal to

provide this simple form of safeguard. The fact that the victim in the latest accident seems to have taken his own chances in trying to cross in front of an approaching train does not entirely eliminate the railroad company's responsibility. The crossings should be made so secure that it will be virtually impossible for a person thus to lose his life through an error of judgment. May the day be not far distant when all railroad lines will be run, in and out of the city regions, between fences so high as to prevent access to the tracks, with all crossings above or below grade.

The assertion that electric cars are the enemies of humanity has now been accredited to the German emperor. It is impossible that a man who is not afraid of the armies of Europe should quail before the

Mr. Tom L. Johnson's antagonism to conditions under which he has so conspicuously prospered has not been accompanied by any contributions to the conscience

Mascagni says he feels much admiration for the new world. No doubt he expects that his coming tour will enable him to mingle admiration with gratitude.

There are preparations on foot to leave Big Bill Devery with the mortifying consciousness that he has wasted a great many

free lunches and theater tickets. The shah's medical advisers have held consultation over him. The shah has been

setting a lively pace of late, and possibly needs a little rest and tonic.

The trusts realizing that money is a great essential to any fight are simply piling up resources without trying to persuade their enemies to be merciful.

President Baer feels that he can be independent. Even the politicians must come to him for their coal.

### The President.

The President returns from his second little journey in good condition physically and with several excellent addresses to his credit. The people received him most cor-Wherever he stopped the manifestations of interest were unmistakably sincere. This man has undoubtedly establish a strong hold on the masses. He appeals to them in a hearty, everyday fashion. He speaks to the point, and all the more effectively for employing plain terms. He does not essay the pose or the vocabulary of

cratic sources is all to the same effect as abundance of orators. They are almost like the poor, in that we have them with us so much. It is a relief therefore to listen occa sionally to a man speaking from a high piace who uses plain United States and dispenses with the parade of practiced gestures. The President's manners are like wise unstilted, and this contributes to his popularity. For a man who was supposed o know nothing about politics he seems to be making fair progress.

Sir Thomas Lipton is willing to give some ther man a chance to compete for the America's cup, if he thinks he can produce yacht that will win. This is an attitude which Mr. Lawson of Boston may have some difficulty in understanding.

A whistler has been engaged to assist in the music of a Chicago church. This fact does not constitute any apology for the man who tries to transform himself into a pic colo during business hours.

King Edward recently visited Mr. Carnegle. The king does not care very much for books, but the conversation on golf was no doubt quite animated.

President Mitchell declines to accept Senator Platt's prophecies that the coal strike s to end soon until the verification arrives

President Roosevelt has been made to reilize that the South is very far from enteraining any personal prejudice toward him.

Any ambitions Haiti may have entertain

ed of being an international trouble-promoter must now be recognized as vain. Every now and then a new germ is discovered, but the difficulty of annihilating

#### SHOOTING STARS.

"That," said Farmer Corntossel, as he ooked admiringly at his hat, "is what I call a bargain.

"It's a little battered," ventured th oarder. "Yes. It only cost eighty cents, an' it's

just as battered and out o' shape as if it was a genuine Panama."

Unreliability. "I have no use for a man who does not keep his word," said Senator Sorghum.

"Have you been disappointed?" "Yes, sir. A fellow promised he would go back on my antagonist and then didn't do

An Annoying Circumstance. The crowds will greet the orator With plaudits loud and clear, But, somehow, now and then they fail

To vote the way they cheer. Traits.

"We recognize an Englishman," said the American, "by the way he drops his h's." "Yes," answered the Englishman; "and re recognize an American by the way he ets go of his money."

"What did you do to the man who rought an automobile to Crimson Gulch?" "Well," answered Broncho Bob, "in order o prevent loss o' life we lynched 'im."

Paradoxical.

Altruism. It's time fur gettin' busy; There's autumn in the air; The orchard is a-waitin'

With the apple and the pear: We've had our share o' summer An' the rest that life demands; It's time fur gettin' busy, So, let's all jine hands.

The snow will soon be drifting An' the wind is going to roar: An' the wolf will come a-prowling Close to many a neighbor's door. All humanity is neighbors. Let us strengthen friendship's bands; It's time fur gettin' busy,

So, let's all jine hands. Though cities proud are risin' While the desert disappears, This world is young; and we'uns Are simply pioneers.

So let's sound the note o' progress Fur our own and other lands: It's time fur gettin' busy,

So, let's all jine hands.

Let Birds Live.

rom the Boston Transcript. While it is true that the work of Audu-

many good women and true that the wear ing of wings is a crime against nature, and that many who have been so convinced will remain faithful to their sense of duty and decency, there are others who, though they embraced the societies' views for a season or two, are known to be weakening in their good resolutions and showing a willingness to go over to the side of the enemy once more. Plainly, appeals to their sentiments and higher natures for bird preservation will be of no further avail. But it may stimulate them to proper outward acts in the matter of ordering their fall millinery if they know that the federal law has been invoked and is now at work in a gentle but firm way as the friend of the birds.

### The Monroe Doctrine.

rom the New York Tribune. The Monroe doctrine is not a bankruptcy act for the benefit of delinquent debtors. It does not say that European rights in the Americas shall not be respected, or that infringement upon them shall not be resented and punished. It merely asserts that European powers shall not spoliate the terri-tories of American States, nor oppress them, nor control their political destinies.

### Discipline for Haytians.

From the Philadelphia Ledger. The shots fired at the Haytian gunboat Crete-a-Pierrot by the German gunboat Panther, although the Haytian vessel was on fire and about to sink, were intended to impress the fact upon the Haytian revolutionists and their like that their semi-piratical antics with the commerce of foreign nations will meet with swift and strong

The German Way in Haiti.

from the Philadelphia Press The German government has taken an nusual and drastic course in sinking the unusual and drastic course in singing the Haitian "revolutionary" steamer Crete-a-Pierrot for overhauling and seizing the cargo of the German steamer Markomannia, but the general verdict will approve.

### Trusts.

rom the New York Herald. The great mass of the intelligent American people are in hearty agreement with the President's advice to avoid rash action which might injure legitimate interests, but which might injure legitimate interests, but to proceed cautiously, intelligently and surely in eliminating the trust evils. A few first steps should be easy of accomplishment. Enforced publicity of every trust's affairs, because investors in inflated trust securities have thus far suffered greater losses than have the consumers of trust products.

Aid for Ex-Confederates. From the New York Mail and Express.

There have been reunions, spectacular and sentimental, of the blue and the gray, and sentimental, of the blue and the gray, in the north and the south. Veterans who fought for the Union have been entertained by veterans who fought for its dismemberment in the capital city of the condederacy. The men who survived Pickett's charge have clasped hands on the field of charge have chasped hands on the field of Gettysburg with those who repulsed that supreme effort of southers courage. These meetings of men who can best appreciate and respect their mutual valor are now supplemented by an appeal, unprecedented but worthy of a general response.

Mr. Boies may run against Speaker Hen-derson in the third congressional district of Iowa. Boies—Boies—let's see, that name
